PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience across Python, web and AI. Built an AI agent with Python, and an LLM API connected to a React frontend, and production REST APIs on PostgreSQL during a backend internship at PearlThoughts. Comfortable building responsive interfaces with HTML, CSS, JavaScript, React and Next.js, designing REST APIs, working with PostgreSQL/MySQL, and automating workflows. Deploys live projects and works with Git/GitHub in Agile teams.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL
- **Backend & APIs:** RestAPI, Node.js, Spring Boot, REST APIs, JWT Authentication, TypeORM
- **Frontend:** HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, Responsive Design
- **AI & Automation:** LLM APIs, LangGraph AI agents, TensorFlow, CNNs, cron-based task automation
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, GitHub, Postman, Docker (basic), Vercel, Netlify, Vite, Agile, OOP, DSA

WORK EXPERIENCE

Backend Developer Intern | *PearlThoughts* | *Remote* *Jun 2026 – Jul 2026*

- Built **Schedula**, a healthcare appointment scheduling system, using NestJS, TypeScript, PostgreSQL and TypeORM
- Developed Doctor and Patient Onboarding REST APIs with request validation, JWT authentication and role-based access control
- Implemented time-based Appointment Booking Window logic and an automated appointment reminder system using scheduled cron jobs
- Tested and debugged APIs end-to-end with Postman, resolving entity mapping and authentication guard issues

Java Full Stack Developer Intern | *JSpiders, BTM* | *Bengaluru* *Jun 2025 – Jan 2026*

- Integrated React frontends with backend REST APIs in real-time web applications
- Developed and tested RESTful APIs using Spring Boot and Postman, including database integration

Web Application Development Intern | *Rooman Technologies* | *Remote* *Sep 2024 – Feb 2025*

- Implemented features and debugged modules in a web application, following Agile sprint workflows

PROJECTS

AI-First CRM HCP Module | *Python, FastAPI, LangGraph, Groq LLM, React* *Apr 2026*

- Built a Python AI agent with LangGraph and an LLM API to manage healthcare professional interactions
- Implemented AI tools for entity extraction, summarization and next-action suggestion; exposed them through FastAPI REST endpoints consumed by a React frontend

Movie Discovery App | *React, TypeScript, Vite, Node.js, Express*

- Built a full-stack web app with a responsive React frontend and a Node.js/Express backend that fetches movie data through REST APIs

Personalized Content Dashboard | *Next.js, TypeScript, Redux Toolkit*

- Built a responsive dashboard with drag-and-drop reordering, debounced search, dark mode and state persistence; deployed live on Vercel

HawkStack — Secure REST API | *Java, Spring Boot, Spring Security* *May 2026*

- Developed a secure REST API with JWT-based authentication and a layered CRUD (controller–service–repository) architecture

Automated White Blood Cancer Detection | *Python, TensorFlow, CNN* *Nov 2024 – Jan 2025*

- Built a CNN model in Python reaching 97% accuracy on bone marrow images, with Grad-CAM for interpretability; exhibited at the 48th KSCST State-Level Student Project Program

EDUCATION

B.E. — Artificial Intelligence and Data Science *Dec 2020 – May 2025*

Angadi Institute of Technology and Management, Belagavi | CGPA: 7.6

CERTIFICATIONS

- Java Full Stack with React.js — JSpiders • Backend Developer Internship — PearlThoughts • IBM: Introduction to Cloud
  - Web Development Internship — Rooman Technologies • KSCST State-Level Project Exhibition
